EDUCATION

Master of Science, Computer Science

Jan 2025-Dec 2026 (Expected)

University of Southern California, Los Angeles, California

Bachelor of Technology, Computer Science And Engineering

Aug 2018-May 2022

JECRC University, Jaipur, Rajasthan

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL, HTML, CSS

Frameworks & Libraries: Django, Pandas, NumPy, Asyncio, Node.js, React.js, Tensorflow, Keras

Tools & Platforms: Google Cloud Platform, PostgreSQL, Git, ServiceNow, Postman, pgAdmin, MongoDB, AndroidStudio

PROFESSIONAL EXPERIENCE

Cloud Developer 1, Hewlett Packard Enterprise, Bangalore

Aug 2022-Dec 2024

- Engineered and deployed 100+ RESTful APIs using Python, Django, and Django REST Framework for Invoice Management and Contracts Onboarding, enabling seamless data synchronization between PostgreSQL and ServiceNow.
- Led end-to-end development of a web-based email notification system (API + UI), improving communication workflows and boosting throughput by 80%.
- Engineered responsive UIs and ITSM forms with React.js, reducing user submission errors by 50% and streamlining task management; delivered REST APIs for HPE GreenLake and Service Insights Portal, driving a 30% increase in cross-module efficiency.
- Mentored 3 junior developers and partnered with 10+ international cross-functional teams, accelerating API delivery and enhancing inter-module performance by 30%.

R&D Intern, NaaS Team, Hewlett Packard Enterprise, Bangalore

Jan 2022-Aug 2022

- Created a Python package with asynchronous functions to automate setup and calibration of network devices (switches and IAPs), eliminating 90% of manual configuration efforts.
- Streamlined troubleshooting report generation and optimized execution workflows, reducing task completion time by 50% and overall manual effort by 70%.
- Built REST APIs to integrate ServiceNow with other applications, improving data exchange and boosting operational efficiency by 50%.

ACADEMIC PROJECTS

Transfer Learning for Image Classification (Keras, Tensorflow)

Jun 2025-Jul 2025

- Developed a waste image classification system using transfer learning with pre-trained CNNs (EfficientNetB0, ResNet50/101, VGG16) across 9 categories, achieving 83% validation accuracy and 97.66% AUC with EfficientNetB0.
- Enhanced model performance by applying data augmentation, early stopping, learning rate scheduling, and class weight balancing; leveraged TensorFlow/Keras, OpenCV, and scikit-learn for training and evaluation.

Artist Search Platform (React.js, Node.js, Kotlin, MongoDB)

Mar 2025-May 2025

- Crafted a full-stack web application and a native Android mobile application leveraging React.js for frontend, and Kotlin-Android SDK for android UI, with a Node.js with Express for backend, integrating the Artsy API for 100,000+ artists and artworks.
- Enforced secure data access through tokenized authentication and structured MongoDB collections for efficient management of users and catalog data.
- Implemented JWT-based user authentication with access tokens for secure login and session management.
- Attained perfect Lighthouse scores 100% for mobile and desktop performance and accessibility.

ACADEMIC ACCOMPLISHMENTS & EXTRACURRICULAR

Vice President, Photography Club

- Led 20-member team, mentored junior photographers, and organized 15+ campus events.
- Won INR 10,000 in a national-level competition for visual storytelling.
